

June 1, 1973

said around 50% if you go over that we are not going to be careful in our spending. So when you go up to 70-75% definitely those school boards are going to be reckless in their spending. So what is the legislature going to do then? They will have to take away local control. You will have to put limitations on those school districts. Now let us say a relatively few districts will get such a high percentage of the cost paid for by the state. So we will have to take away local control from all of the school districts because a relatively few will be getting more far more than the 50%. Now Senator Warner said that there is more equity in the taxes. I say that there is less equity. Why? Because many school districts may be left with high, will be left with high mil levies. There are many senators in this body who discovered that the mil levies are going to be less than some others between 28-38 and 43-44 mils whereas other school districts are going to be pulled down to 19.7 mils. I say that this is inequitable. Not only that, but those that are being pulled down to the 19.7 mils are paying fewer dollars, than those who if the other districts are still paying 19.7 the districts that are now going to be left with a higher mil levies are going to be paying many times in dollars what those of 19.7 mils are going to be paying. So, it is said lets it started. Anything, to get it started, but I say that you are not going to get a change in the formula once it is started. I tried to change this formula, I put an amendment on this bill so that some of those school districts of 43-40 mils would be pulled down to a reasonable figure. How many votes did I get in this legislature? Only 10. Ten. That is all that I got. This is an indication that if we know right now what is going to happen which we do know we are not going to make a change. So I say, lets not override the Governors veto lets leave it where it is and lets not increase the sales-income taxes. Lets continue to leave this state aid as it is now. The Governor signed the bill to let us have 20 million and this is going to take care of the worse situations. I Propose that we not override the Governors veto, because this is not going to solve the problem and I don't feel that we can do an injustice to so many people as this bill would do.

PRESIDENT: Chair next recognizes Senator Dickinson, Carpenter then Nore.

SENATOR DICKINSON: Mr. Speaker, members of the body, I rise to strongly urge your support of Senator Warner's attempt at an override of this bill. You have just circulated before you some sheets that were just brought to me that show you the position of the Valley Public Schools. Now we heard about the pay in in this room that so many times that we get a little tired of it perhaps but they do have problems. Valley is voting next Tuesday I believe on a bond issue that will raise there mil levy 10 mils and they desperately need a school and I think that the voters in that district will vote for this bond issue. That will then make their total school levy of about 95-97 mils. Now Senator Whitney has moaned and cried in this room to the point that it gets a little tiresome too, and I have never stood up here before and charged an individual but Senator Whitney is completely unrealistic in saying that some districts are treated differently than others. Of course they are. We are trying to equalize a tax obligation to support public schools. When you grate a road you take down the high spots and fill in the low spots. That is what we are trying to do with this bill. Now early all legislation has been passed by this body this....since I have been here
